# About us

ejoin is a Slovak **manufacturer and developer** of charging stations for electric vehicles.

Development of the charging stations started back in **2015**.

Company was founded in **2018**, as a sister company of **Bioelektro Energy 3** that is a local energy supplier since 2012.

We also have our own **infrastructure** of public charging stations.

# Production

Because we develop charging stations ourselves, we are able to react to **any demands proposed by the market.**

We produce charging stations in our own factory in **Dubnica nad Vahom.**

Today we produce **200 pieces of AC charging stations and 40 pieces of DC charging stations for the quarter,** however our factory is able to produce much more.

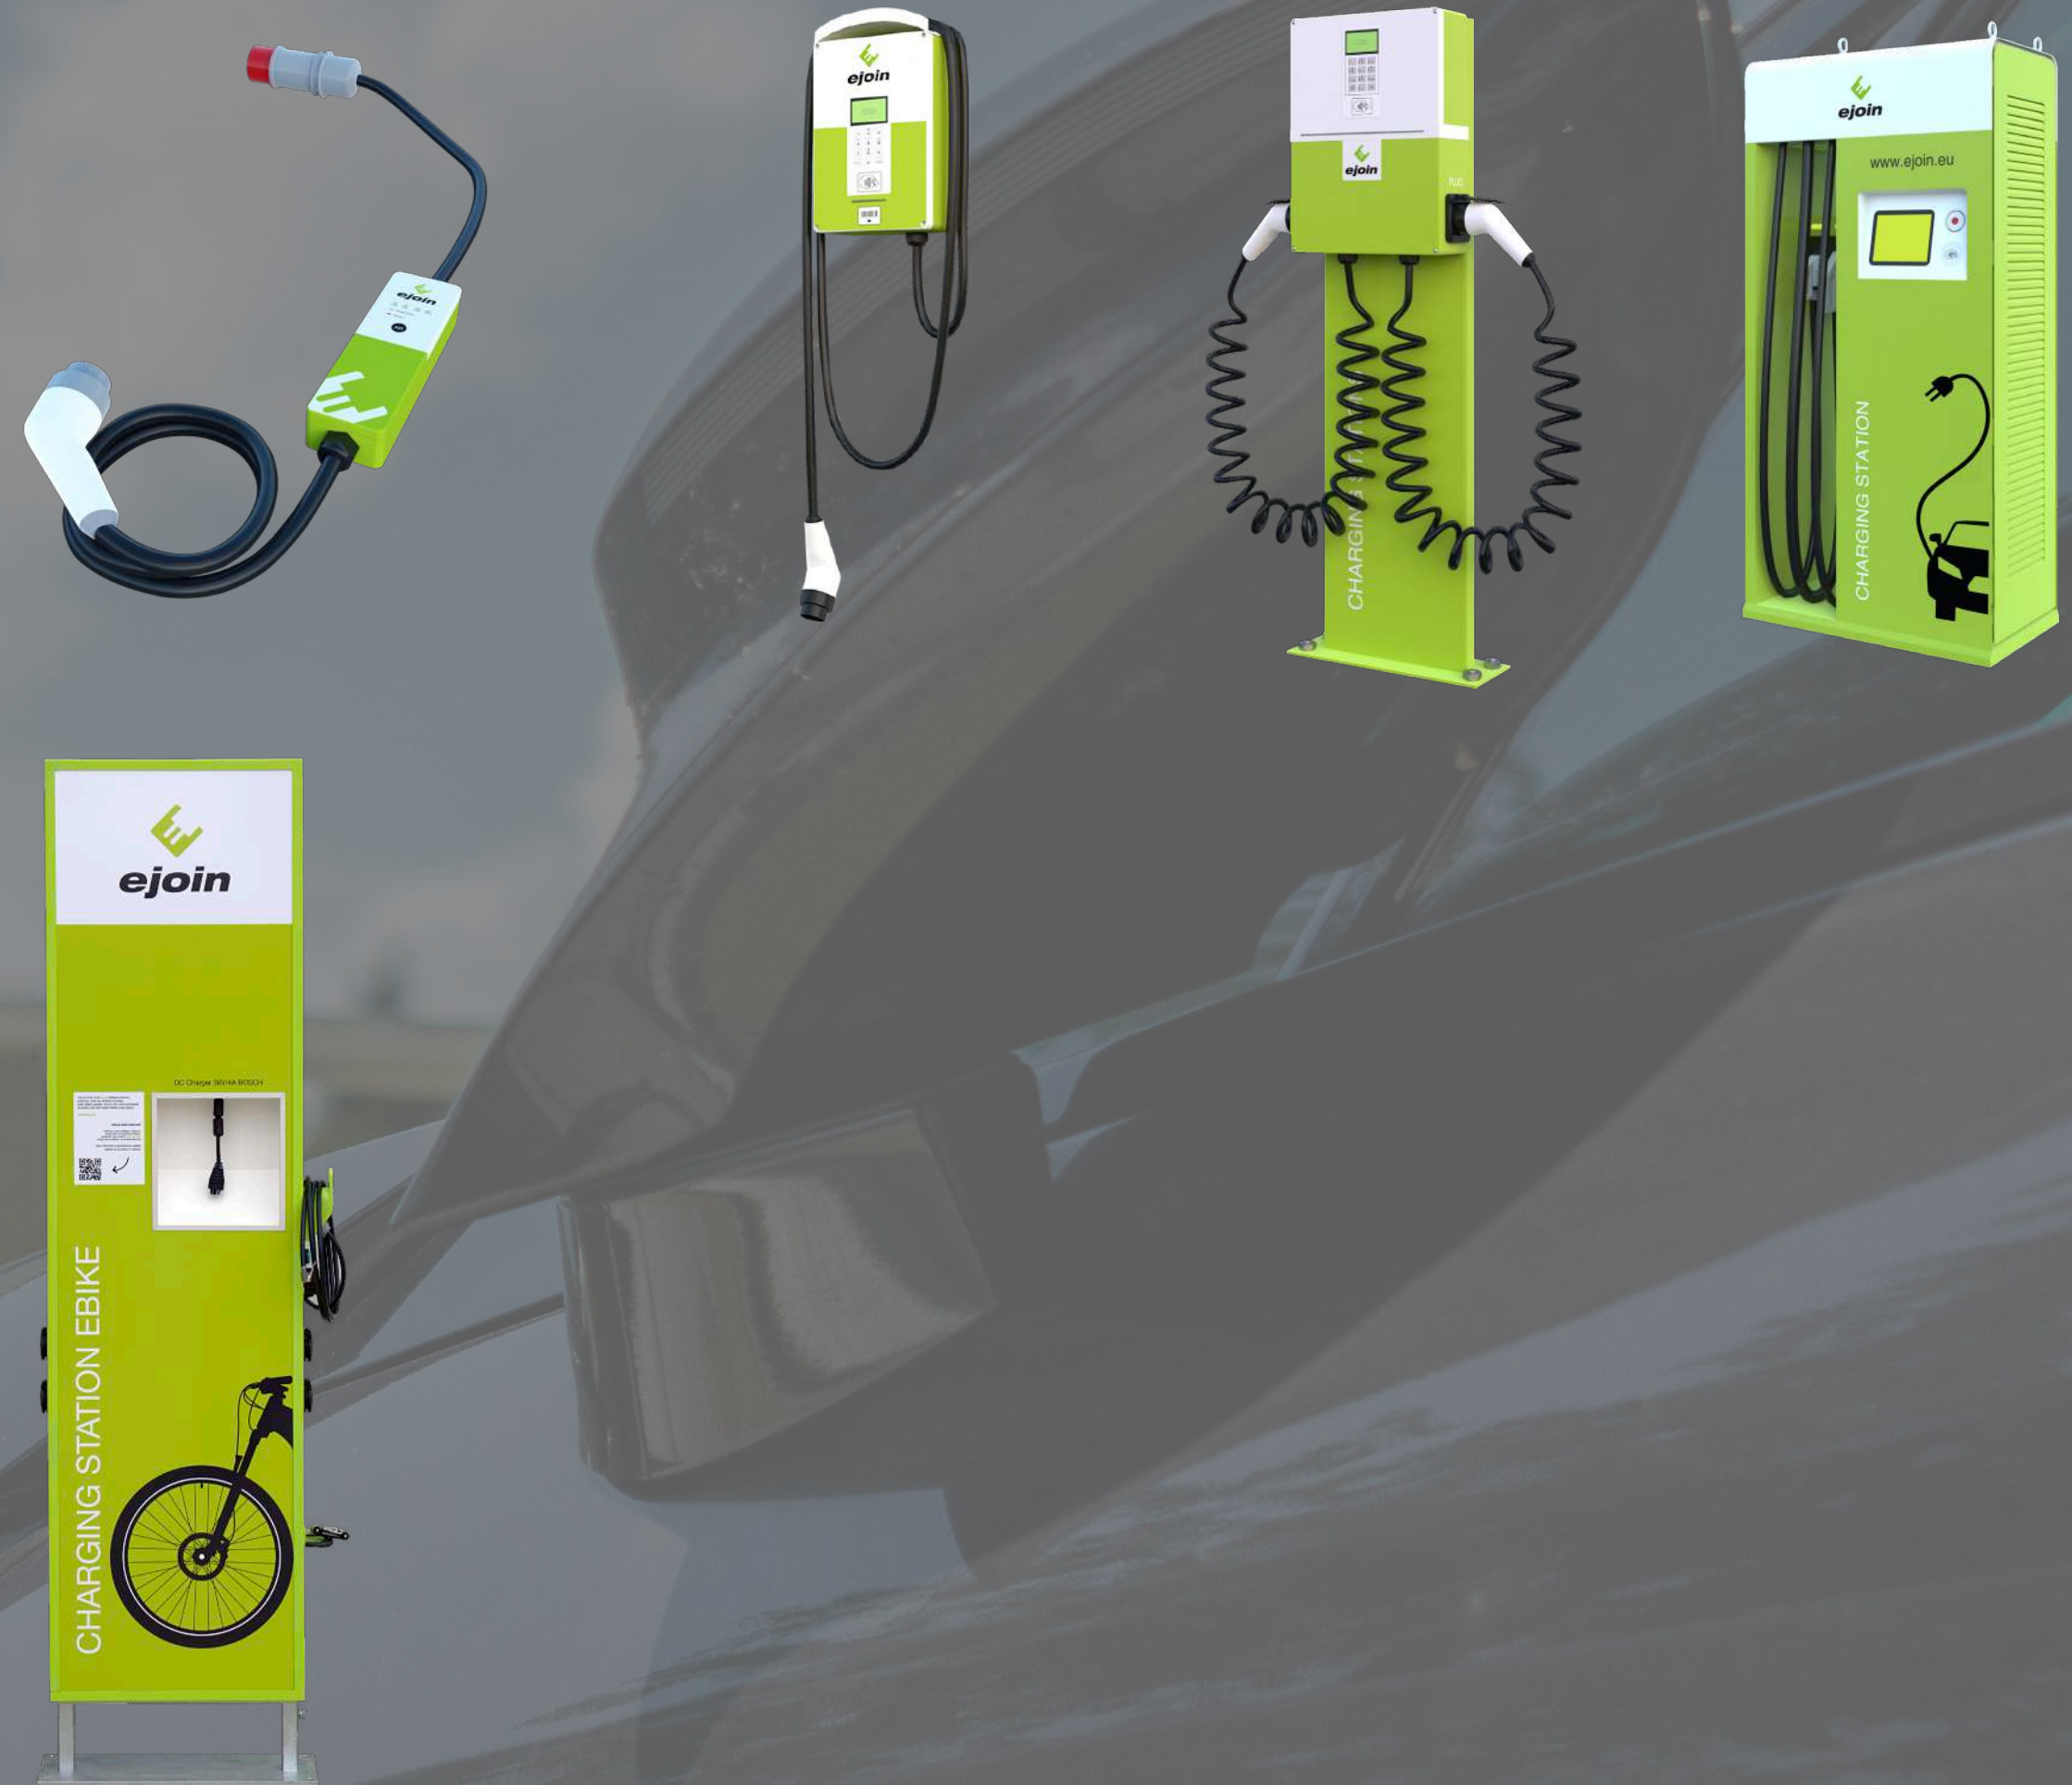

# Products

We offer wide portfolio of products: **slow charging stations** in numerous possible configurations and **fast charging stations**.

Since 2019 we also offer **charging stations for e-bikes**.

# Some of our achievements

We sold **150 charging stations** to **Skoda factory** in Mlada Boleslav, Czech Republic.

We produced AC and DC charging stations for **Agora project** in Budapest, Hungary.

We provided charging stations for **Skoda eMobility training event** in Benidorm, Spain.

We provided **DC charging stations** to **Porsche factory**.

# Future Plans

We are developing a **mobile charging station**, which will be available later this year.

We are developing a **charging system with built-in battery storage**, in cooperation with our other company **Elteco**.

# Future Plans

Next year we expect a production raise up to **200 DC** and **1500 AC charging stations** per quarter.

In 2022 we predict **expansion of the production factory**.
